FACES AND THINGS - THE GUIDE

Warning: THIS MANUAL MUST NOT BE REPRODUCED OR REDISTRIBUTED. The content herein are the intellectual properties of Salewa Onaneye and Matthew Onaneye.

GAME 1 WHO IS THIS?

OBJECTIVE – MEMORISING NAMES AND

FACES AIM – EXERCISING THE MEMORY

HOW TO PLAY

1. Arrange a number of cards on the table (the number would depend on the age of your child).

2. If your child can't read names yet, point to the characters in the cards and tell them their names.

3. Depending on the number of characters you've placed in front of them, give them a few seconds or minutes to memorise these characters.

4. After they have memorized them, pack all the cards and pull out a random character, while covering the name, and ask a simple **"Who is this?"**

Here, their brains would unconsciously try to remember your voice, as well as the name in the card when they saw it.

This would fire the neurons in their brains as they try to remember these names,

and it would make their memory muscles stronger by the day.

GAME 2 WHO/WHAT IS HERE?

AIM – TO DEVELOP THE VISUAL MEMORY OF YOUR CHILD

OBJECTIVES - MEMORISING ARRANGEMENT OF THINGS AND PEOPLE

HOW TO PLAY

1. Depending on the age of the child involved, you will arrange a number of character or object cards on your table with their faces up.

2. Give your child a few minutes to memorise the arrangement of the cards.

Then turn the cards down, while still maintaining that arrangement.

3. While pointing to any card (remember, the cards are facing down now), you will then proceed to ask your child a simple question like this – Who/what is in this position?

He'll try to use his mental powers to form a mental image of the arrangement of these cards in his mind, when they were facing up. This is the aim of this game. To fire up the ability to form mental images in his mind.

This is exactly how geniuses fire up their brains according to a research in Harvard University, and you can begin to train your child to be a genius as well.

This would ensure that he is actually a lot sharper than other kids around.

GAME 3 WHO IS MISSING?

AIM – TO RECOGNIZE THE PRESENCE OF THINGS

OBJECTIVE – TO TRAIN A CHILD'S FOCUS

HOW TO PLAY

1. Arrange a number of characters on your desk.

2. Let your child spend some minutes looking at these characters. Make them cover their eyes, or blindfold them.

3. Remove some characters from the desk.

4. Let him look at the characters again, and and ask a simple question **"who is missing?"** or you can make it more interesting and say **"Who has run away from school?"**

Again, they would begin to fire up their mental powers, trying to form the mental images in their minds.

GAME 4 WHO OWNS WHAT?

HOW TO PLAY

1. Place a number of character cards on the table, but right beside them, you would place object cards right beside them.

This is what I mean – Take a character card, and next to it, place an object card.

Beneath this first arrangement, place other character cards next to object cards.

2. Get a sheet of paper and write this arrangement in this manner "**Tobi owns A book**"

3. Allow your child to memorise these arrangement for a few minutes

4. Remove the character cards

5. Then begin to ask simple questions like this **"What did Tobi bring to Tina's house today?"**

You can get more creative with the questions.

GAME 5 WHO/WHAT MOVED?

AIM – TO TRAIN AND INCREASE YOUR CHILD'S LEVEL OF FOCUS.

HOW TO PLAY

1. Arrange a number of character cards and make sure they are all exposed, meaning you should turn up the faces of the card.

2. Give your child a few seconds or minutes to note this arrangement carefully (depending on the number of cards on display) Note the arrangement of these cards carefully yourself.

3. Blindfold your child's eyes

4. Swap the position of a number of cards

5. Open his eyes and ask a simple question – **“Someone has moved away from their position. Who moved?”**

Sit back, relax and watch how your child would begin to fire up the genius in him.

GAME 6 – WHAT’S THEIR POSITION

AIM – TO IMPROVE ATTENTION AND FOCUS

HOW TO PLAY

1. Allow your child pick a number of cards (between 5 – 20 characters), and let him study their arrangement.

2. Now, memorise this arrangement yourself. If you can’t memorise this arrangement, get a piece of paper out and list out the characters that your child selected

3. Collect all the cards from your child

4. Bring out a random card and ask this simple question for example –

“what was Amaka’s position?”

5. Do this for all the cards you randomly select.

6. Award points for each correct answer.

To make this fun, allow your child take your position and ask you questions as well.

GAME 7 WHAT’S THEIR POSITION (VARIATION)

AIM – TO IMPROVE ATTENTION AND FOCUS

HOW TO PLAY

Another variation of this game is to arrange the cards in a specific order, and let your child study this arrangement for 5 mins

Rows and columns formation

Take a picture of this formation, so you can have something to refer to.

With your child looking at these cards, begin to swap their positions randomly.

This will force your child to use all his concentration power to study these movements.

Depending on your child's age, you should swap between 5-15 cards
(3-4yrs, swap 5 cards)

(5-8, swap 10 cards)

(8-12, swap 15 cards)

<u>GAME 8 – WHAT'S THEIR POSITION (ROLES REVERSED)</u> AIM

– TO TRAIN THE AUDITORY MEMORY (BACKUP MEMORY) This is similar to game 6 (What's Their Position?)

HOW TO PLAY

1. Here instead, you draw out a number of character cards (10 – 30)

2. Call their names out loud and their position for your kids (but make sure you have written these names in a list e.g 1. Amaka 2. Segun 3. Sunita etc)

3. Now, shuffle the cards (I mean scatter the arrangement of the cards.)

4. Now, tell your child to draw out a random card himself and tell you it's position

If you are making it a competition between your kids, award points for every correct reply.

GAME 9 – ALTERNATE REALITIES

AIM – TO STIMULATE CREATIVITY

HOW TO PLAY

1. Arrange the character cards, animal cards and object cards and turn them down (an example is shown in the image below).

2. Let your kids choose any number of cards from each section (character, animal and object)

Let's assume your child picks the following cards -

a. Amaka (character card)

b. Elephant (animal card)
c. Bag (object card)

3. The next thing would be for him to switch their roles, forming funny realities.

Here's what I mean, your child can close his eyes and say something like this - .

"I can see an elephant walking to my classroom with a school bag"

"I can see a bag in the jungle giving birth to an elephant"

"I can see Amaka walking to church with an elephant inside her bag, instead of her bible"

"I can see an elephant with a bag riding on Amaka's back to school."

The possibilities are endless.
You should record your child's answers as he forms these things.

The things you can come up with are endless and this promises to be fun.

Now here's the fun part - let your child select another set of cards and come up with funny things.

At the end of this, ask him to repeat to you all the funny realities he created in his mind earlier.

This will make him use two things at once - his brain powers and muscles, and his creative mind!

GAME 10 – WHO/WHAT IS MISSING (AUDITORY VERSION)

HOW TO PLAY

Depending on your child's age,

Get out 3-10 character cards

Get out 3-10 animal and object cards.

Loudly, call out the names of the characters in these cards. Spend a few seconds doing this.

After that, remove one or two characters or animals/objects and ask them

"what/who is missing?"

Make this exciting!
The whole essence of is to sharpen their auditory memory - the ability to hear and remember.

Also, take turns doing this.

This is more fun when your kids call out characters for you and their siblings, and you all try to figure out the missing characters

GAME 11 – WHO SANG WHAT?

AIM – MATCHING SOUNDS TO CHARACTERS

OBJECTIVE – TO CREATE A STRONG AUDITORY OR BACKUP MEMORY

HOW TO PLAY

1. Get out a number of character cards - depending on your child's age, it could range from 5-20 characters.

2. Play a sound on your phone, a ringing tone or song (find out what works better for you). Then match this tone to a character.

3. Make a statement like this "Sunita is playing this sound"

4. Then you place Sunita on a separate space

5. Repeat the same process for the other cards

6. Once you've done this, play the sounds randomly and ask your

kids to tell you ***"who played this sound"***

<u>GAME 12 – MEMORY TRAIN</u>

AIM – REPEATING A SEQUENCE OF PREVIOUS OBJECTS

OBJECTIVE – HELP EXERCISE YOUR CHILD'S BRAIN, IMPROVE CONCENTRATION, ENHANCE COGNITIVE FUNCTIONALITY, TRAINS VISUAL MEMORY, BOOST FOCUS AND ATTENTION

HOW TO PLAY

1. Get out a number of object and animal cards - depending on your child's age, it could range from 5-30 characters.

2. You then start the game by picking a random card (maybe you picked the
TELEVISION card) and saying: "I am going to the beach, and I am taking my 'Television' with me." Then you place the card elsewhere you can't see it.

3. The next person picks up another card (for example "dog" card) and creates a chain with the card picked by the previous player, and says something like: "I am going to the beach and I am taking my Television and my dog with me." Then this player tucks the card away.

4. The next player picks a random card and does the same thing as step 3 above, while adding a new thing. For example: "I am

going to the beach and I am taking my television, dog, and cap with me."

5. Keep doing this until someone breaks the chain.

GAME 13 - SWAP THE FACES.

AIM – SWAPPING A SERIES OF CARDS

OBJECTIVE – HELP EXERCISE YOUR CHILD'S BRAIN, IMPROVE CONCENTRATION, ENHANCE COGNITIVE FUNCTIONALITY, TRAINS VISUAL MEMORY, BOOST FOCUS AND ATTENTION

HOW TO PLAY

Depending on the age and current ability of your child, use 4-64 cards

1. Arrange the cards in a square grid.

This means if you're using 4 cards, arrange them in 2by2 rows and columns. 2 cards in the rows, 2 cards in the columns.

If you're using 25 cards, use 5 by 5...etc.

2. Take a snapshot of these arranged cards.

3. Begin to swap as many faces as you can.

4. After swapping, your child will try to return the swapped faces to their original position.

Award a point for each face that is returned to its appropriate position.

To make this even more fun, try to rearrange them yourself as well without looking at your phone where you took the shot.

When that round is over, switch positions. Let your child arrange the cards and swap them. Now, it's your turn to rearrange.

GAME 14 - MATCH THE FACES.

AIM – MATCH A SERIES OF HUMAN CHARACTERS TO CORRESPONDING OBJECT CHARACTERS

OBJECTIVE – HELP EXERCISE YOUR CHILD'S BRAIN, IMPROVE CONCENTRATION, ENHANCE COGNITIVE FUNCTIONALITY, TRAINS VISUAL MEMORY, BOOST FOCUS AND ATTENTION

HOW TO PLAY

Depending on the age and current ability of your child, you start with 6 cards (3 human characters, 3 object characters)

1. Write the names of each character selected in a piece of paper like this; for example:

    i. Musa - Kettle

    ii. Ada - Bag

    iii. Segun - Car.

2. Allow your child to memorise these pairings for some seconds

3. Arrange the cards in a square grid i.e 3 up, and 3 below. Arrange these cards randomly and face them down. Let your child study these arrangements for a few minutes before you turn the cards down.

4. Instruct your child to turn any card over. And once he/she picks any card, he must in turn locate the corresponding card.
For example, if he/she randomly picks the Car card, he/she must locate the corresponding card among the ones faced down i.e Segun!

Make this a competition between your kids if you have more than one

GAME 14 - MATCH THE FACES.

AIM – MATCH A SERIES OF HUMAN CHARACTERS TO CORRESPONDING OBJECT CHARACTERS

OBJECTIVE – HELP EXERCISE YOUR CHILD'S BRAIN, IMPROVE CONCENTRATION, ENHANCE COGNITIVE FUNCTIONALITY, TRAINS VISUAL MEMORY, BOOST FOCUS AND ATTENTION

HOW TO PLAY

Depending on the age and current ability of your child, you start with 6 cards (3 human characters, 3 object characters)

1. Write the names of each character selected in a piece of paper like this; for example:

    i. Musa - Kettle

    ii. Ada - Bag

    iii. Segun - Car.

2. Allow your child to memorise these pairings for some seconds

3. Arrange the cards in a square grid i.e 3 up, and 3 below. Arrange these cards randomly and face them down. Let your child study these arrangements for a few minutes before you turn the cards down.
4. Instruct your child to turn any card over. And once he/she picks any

card, he must in turn locate the corresponding card.

For example, if he/she randomly picks the Car card, he/she must locate the corresponding card among the ones faced down i.e Segun!

Make this a competition between your kids if you have more than one

GAME 15 - WHAT IS WHO DOING?

AIM – FORM A CHAIN OF SHORT SENTENCES USING RANDOMLY SELECTED CHARACTERS.

OBJECTIVE – HELP EXERCISE YOUR CHILD'S BRAIN, IMPROVE CONCENTRATION, ENHANCE COGNITIVE FUNCTIONALITY, TRAIN AUDIO AND MEMORY, BOOST FOCUS AND ATTENTION

HOW TO PLAY

Depending on the age and current ability of your child, you start with 8 random cards

Allow your children select these cards themselves with their eyes closed or blindfolded.

1. Your child should pick a random card from the Human characters, and randomly select another card from the Objects and Animals Card

2. Then he/she will form a sentence like this:

For example, let's say he picked "Musa" and "Dog", he can say:

"Yesterday, on my way to school, I saw a **dog** running after **Musa**"

3. Then the next player will repeat step 1 and form a chain.

So let's assume player 2 picks "**Amina**" and "**Phone**", the next sentence would be:

“Yesterday, on my way to school, I saw a dog running after Musa. A few seconds later, I saw **Amina** pressing her **phone**, screaming at the dog to get back.”

Then the next person takes their turn and forms another chain sentence

GAME 16 - FOLLOW ME CLOSELY/PATTERN TRAILER.

OBJECTIVE – HELP IMPROVE YOUR CHILD’S CONCENTRATION, ENHANCE COGNITIVE FUNCTIONALITY, TRAIN AUDIO AND MEMORY, BOOST FOCUS AND ATTENTION

HOW TO PLAY

Depending on the age and current ability of your child, you start with 4 random cards.

Click here to watch this video to see how to play this…

https://www.youtube.com/watch?v=vGVNEW-nZmo&t=1

s

GAME 17 - MATCH ‘EM UP.

OBJECTIVE – HELP IMPROVE YOUR CHILD’S CONCENTRATION, TRAIN AUDIO AND MEMORY, BOOST FOCUS AND ATTENTION

HOW TO PLAY

1. Depending on the age and current ability of your child, you can start with 8 - 16 cards and relate them together..

2. For example you can pick these cards: Television, TV Remote, Cow, Car, Sheep, Grandma Cecilia, Cap, Cloth, Donkey, Pot etc…

3. Then arrange these cards in a square grid as shown in the image attached..

4. Get out a sheet of paper and begin to relate these cards together: For

example: HORSE - ZEBRA, GRANDMA NINA - GRANDMA CECILIA, JANET - TINA, KETTLE - POT etc.

5. Give your child 3 minutes to study the arrangement of the cards, and another 2 minutes to study how you have related them in step 3.

6. Turn the cards down.

7. Let your child begin to turn their faces back one by one Let's say he turns up HORSE, the next card he must turn up is ZEBRA...because those are the cards you related.

8. If he turns up HORSE and the next card he turns up is JANET, he must turn down both cards and start all over again.

9. If he turns up HORSE and turns up ZEBRA next, he leaves both cards facing up and moves to the next cards that are still facing down…

10. And he repeats step 7 - 9 again.
    Give your child 30 seconds or 45 seconds to complete this task

    Then record his scores. Each correct pairing is one mark.

    Make this a competition between him and his siblings and reward them with sweets or something they like for participating.

<u>GAME 18 - FIND THE TREASURE</u>.

OBJECTIVE – HELP IMPROVE YOUR CHILD'S CONCENTRATION, AND TRAIN THEM ON HOW TO NOTICE THINGS VERY FAST.

HOW TO PLAY

1. Depending on the age and current ability of your child, you can start with 4 - 15 cards..
2. Place these cards at the intersection of the horizontal and vertical lines. An example is shown in the image attached..

Make sure that your child isn't looking when you're placing the cards on the map.

4. List out the cards you have arranged. The last card will be the treasure.

5. Give your child a sheet of paper to write out the coordinates of the items placed on the map, which you must have listed out for them.

For example:

1. BAG - (2, 3).... Look at 'bag' closely. It is resting on line 2 on the X axis, and line 3 on the Y axis
2. ELEPHANT - (4, 6)
3. SHEEP - (6, 4)

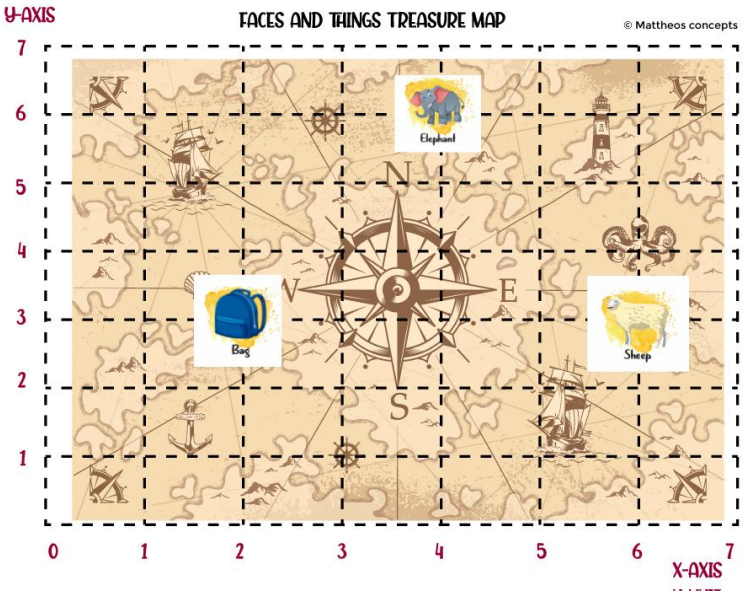

6. Set a timer if it is only one child. If there are two kids, set a timer, still…whoever ends up finishing writing the coordinates first takes the prize

GAME 19 - FIND THE TREASURE.

OBJECTIVE – HELP IMPROVE YOUR CHILD'S CONCENTRATION, TRAIN AUDIO AND MEMORY, BOOST FOCUS AND ATTENTION

HOW TO PLAY

1. Depending on the age and current ability of your child, you can start with 4 - 15 cards..
2. Place these cards at the intersection of the horizontal and vertical lines. An example is shown in the image attached..

Make sure that your child isn't looking when you're placing the cards on the map.

4. List out the cards you have arranged. The last card will be the treasure.

5. Give your child a sheet of paper to write out the coordinates of the items placed on the map, which you must have listed out for them.

For example:

1. BAG - (2, 3).... Look at 'bag' closely. It is resting on line 2 on the X axis, and line 3 on the Y axis
2. ELEPHANT - (4, 6)
3. SHEEP - (6, 4)

6. Set a timer if it is only one child. If there are two kids, set a timer, still…whoever ends up finishing writing the coordinates first takes the prize
